San Patricio County's COVID-19 Situation Report

Today, Public Health Preparedness Department reported nine (9) new cases that are all under investigation and our hospitalization count is zero. The County's confirmed COVID-19 case count will move to 1393. The County's completed tests count is 3628.

The County's active case count moves down to 44 as this count also denotes that seventy-six (76) individuals were released from COVID-19 protocol. Half of those individuals released today are from cases reported between March and May but the County did not acknowledge their release from COVID-19 protocol until now with this Situation Report. DSHS is reporting sixty-four (64) COVID-19 fatalities for San Patricio County at the time of this release. The County's immediate risk of transmission is intermediate.

Reminder: Isolation is required after being diagnosed with COVID-19 in order to slow the spread of this virus. The CDC recommends isolation be maintained for at least 10 days after illness onset AND at least 3 days (72 hours) after recovery. Illness onset is the date symptoms began and recovery is the resolution of fever with improvement of other symptoms.

Transmission	Inside the Case Count Numbers As of September 14, 2020		
	New Cases	Case Count	Recovered
Travel Related	0	14	12
Known Close Contact	0	47	43
